

# Annual Learning Competition to Raise State Test Scores Completes its Sixth Year

## The JogNog Tower Challenge Announces the Winners for the 2016-2017 Competition

Press release: Wakefield, MA, June 1, 2017

For the past six years the JogNog Tower Challenge (JTC) has been an important part of learning and skills building in many schools across the United States. The JTC is a competition among schools to see how many quizzes its students can successfully complete. Each quiz consists of from 30 to 100 challenging review questions on all subjects including Science, Math, ELA and History, for grades two through twelve.

This week, the year-long contest came to an end with more than 300 schools from around the country participating. The students correctly answered more than five million challenging review questions based on their school's curriculum standards.

The JogNog Tower Challenge helps teachers and principals to better prepare their students for state testing. The goal of state testing is to identify and help students that do not possess the basic knowledge required for their grade level. The goal for schools and teachers is to identify strategies to challenge these students to move from 'below the bar' to 'above the bar'. One of the best ways to do this is to make sure that students don't forget what they have already learned.

The JogNog Tower Challenge is a team-based competitive learning contest that provides students with a fun and exciting way to review and remember what they have learned in class and apply it to state tests. JogNog stands for "Jogging your noggin" and it is aptly named as JogNog is particularly helpful in getting students to remember and review many things that they had previously learned.

The JogNog Tower Challenge is free to schools and runs from October to May each school year. Schools that join the JogNog Tower Challenge have access to nearly 100,000 review questions that map to the curriculum standards that teachers have covered in class. JogNog can also be used for summative and formative assessment and learning from a computer, smartphone, Chromebook, or tablet.

The JogNog Tower Challenge uniquely motivates students to work together to learn and correctly answer as many science, math, ELA and history questions as they can by providing a team-based learning environment with leaderboards, mastery levels and badges for accomplishment.

Steve Smith, CEO and co-founder of JogNog, was excited about this year's contest: "We have seen great growth in participation in this important competition and we look forward to improved test scores at the schools that participated. But the most important thing is that the JTC is a lot of fun and we continually hear from teachers that their students come out of the state tests saying: 'I knew the answer to that question – I remember it from JogNog.'"
