

New Learning App with Streamlined Integration for iPad, iPhone and Google

JogNog Release 5.0 for iOS has key features for ease of use

Press release: Wakefield, MA, July 27, 2016

Though the Google Chromebook has recently become the leader in educational devices for students in schools, the iOS devices from Apple such as the iPhone and iPad still garner a tremendous amount of usage from students at home. The JogNog learning app has been upgraded and improved to work even better on the iPad and iPhone.

With the 5.0 iOS release of JogNog several important new features have been added and updated:

- Ability to erase sketches and notes on the iPad so that students can work out problems directly on the screen before they answer a question
- Support for the new iPad Pro with the Retina display for enhanced screen resolution
- Improved integration with Facebook that makes it even easier to sign in directly without having to remember passwords or user names
- Graphical directions that make it easier for new users to get started quickly and easily
- Google authentication streamlined for tighter integration for those schools using Google for Education and Google Classroom

Steve Smith, CEO and co-founder of JogNog, commented on the breakthroughs of the new product release: “We’ve added both big things like Google and Facebook streamlined integration as well as little things like the eraser on the iPad app. The teachers will love the ease with which students can now quickly get onto JogNog and the students have been asking for an eraser so that should make them pretty happy as well!”

About JogNog

JogNog is an easy way for teachers to review the standards and topics that their students need to know for their state tests in Science, Technology and Engineering,

Math, ELA and Social Studies. When used regularly, JogNog has been shown to have significant positive impact on state test scores. JogNog is available on the web for Google Classroom and Microsoft Office 365 users and as an app for iPad, iPhone, Android, Chromebook, Kindle Fire, and Windows Phone. For more information about JogNog, visit www.JogNog.com.
